DIRECTIONS FOR USE**Shake well before using**

CLASS ACT Next Generation may be used at a rate of 2.5-5.0% v/v (2.5-5.0 gallons per 100 gallons of spray solution). This meets Roundup® Original, Cornerstone® and similar product label requirements for 0.5-1.0% v/v nonionic surfactant plus 8.5-17 pounds of dry ammonium sulfate per 100 gallons of water. Follow herbicide label for specific rates, mixing instructions and other precautionary instructions. Do not mix CLASS ACT NEXT GENERATION with INTERLOCK™ in an induction system or container when both products are undiluted. Once mixed in water, both products are compatible in either mixing order.
