

Complex™

Non-Ionic Spreader Sticker

PROSOURCE ONE

Self-emulsifiable spreader sticker

Complex is a self-emulsifiable spreader sticker and non-ionic surfactant that improves the efficiency of herbicide, insecticide, and fungicide sprays. It reduces surface tension for better coverage, increases adhesion, and enhances penetration of the leaf wax for improved product performance. It also increases spray droplet size, which minimizes drift.

ACTIVE INGREDIENTS

Alkyl polyoxyethylene ethers, polymerized resins and fatty acids	17.77%
Triethanol amine	5.26%
Inert ingredients	76.97%
Total = 100%	

Complex™

Non-Ionic Spreader Sticker

PROSOURCE ONE

Uses

Complex is an effective spreader sticker and non-ionic surfactant that enhances the effectiveness of a variety of plant protection products. It also functions as a drift control agent, by increasing spray droplet size.

Benefits

Complex provides the following benefits:

- Surfactant to help keep the solution in suspension
- Increased spray droplet size for reduced off-target spray drift, and reduced spray evaporation
- Reduced surface tension for greater spreading of product over the plant surface
- Increased adhesion to plant surfaces and penetration of the leaf wax
- More efficient plant protection product performance

APPLICATION RATE

Application	Range of Complex rates per 100 gallons of spray solution
Fungicides and acaricides	0.5 to 2 pints / 100 gal.
Herbicides (refer to product label)	1 to 3 pints / 100 gal.
Insecticides	0.5 to 2 pints / 100 gal.
Wettable powders	0.5 to 2 pints / 100 gal.
For drift reduction	1 to 3 pints / 100 gal.

Always read and follow label directions.

PACKAGING

Complex comes in the following packaging:

- 1 gallon jug
- Case: 4 x 1 gallon jugs

Always read and follow label directions.
