

Level 7™ Multicomponent Adjuvant System

Crop-based spreader, water conditioner, and acidifying agent **PROSOURCE ONE**

As a spray-solution spreader, Level 7 helps improve plant coverage and penetration, allowing more active ingredients to move into target plants.

As a water conditioner in spray solutions, Level 7 ties up the free ions that can inhibit the performance of many pesticides.

And as an acidifying agent, Level 7 lowers the pH of spray solutions, preventing hydrolysis of many pesticides, especially fungicides and insecticides.

Unleash the Performance of Spray-Tank Solutions

ACTIVE INGREDIENTS

Proprietary blend of high-fructose corn syrup, ammonium sulfate, water conditioning, buffering, coupling, and antifoam agents	.52%
Constituents ineffective as spray adjuvant	.48%
TOTAL	100%

PACKAGING

Level 7™ comes in the following packaging:

- 2 x 2.5-gallon package
- Mini-bulk and bulk

Always read and follow label directions. AgriSolutions, Level 7, and Alliance are trademarks of Agrilience, LLC. © 2005 Agrilience, LLC

APPLICATION RATE

Spreader, Penetrator:

Herbicides, insecticides, fungicides, and foliar nutrients — 2 to 6 pints per 100 gallons of spray solution

Water Conditioner:

Standard use rate — 4 pints, with a range of 3 to 6 pints, per 100 gallons

Spray water < 300 ppm hardness — 4 or more pints per 100 gallons;
 Spray water < 500 ppm hardness — 6 pints per 100 gallons

Note: For water with 500 ppm or greater, Alliance™ is recommended. Under stressful conditions, or with greater populations of hard-to-control weeds, use higher rates of Level 7 or use Alliance.

Acidifying Agent:

Beginning pH	Suggested rate
< 8	4 – 8 fl. oz.
8	6 – 16 fl. oz.
9	12 – 24 fl. oz.
10	16 – 32 fl. oz.
